Re: Utility Solutions – D2005.11.163 & D2005.11.164

On June 11, 2007, Utility Solutions, LLC requested an extension of time to file its rate case for a final order in the above dockets. When Utility Solutions under the direction of its consultant Ron Woods started compiling the information necessary to make the compliance filing, it was discovered that there was some discrepancies in its compiled financial information. Because of this, Utility Solutions is reviewing all its entries for 2006 to ensure accuracy of the financial records.

In talking to Ron Woods, Utility Solutions consultant, he stated that as he was preparing the rate case, there were some discrepancies in the compiled financial statements. This necessitated the review of all Utility Solutions entries for the test year, and may require restating of the annual reports. In light of these problems, an extension of time is requested and needed by Utility Solutions.

Staff recommends granting the extension of time to file the rate case by Utility Solutions to August 15, 2007 as requested.
